

Easy Clean Galaxy Gutter Cleaning System

This cleaning system can reach gutters as high as 12 meters. Use it in combination with a wet vacuum cleaner with strong suction power such as RONDA® 520.

The system consists of 1,5 meter carbon fiber tubes, giving a strong construction but also a very low total weight; each tube weighs only 300g. The tubes are held together using a simple and efficient clamp mechanism. Various nozzles are included, so the system can be used for many different cleaning tasks.

Easy Clean Galaxy is distinguished by having an integrated air control valve in the lower tube, which makes it easy to supply the vacuum cleaner with false air in cases where the nozzle is blocked by eg. larger pieces of moss, a tennis ball or the like. If the nozzle is blocked by, for example, a tennis ball, turn the air control valve so that the suction is reduced sufficiently for the tennis ball to drop and fall to the ground. In this way, it is not necessary to turn off the vacuum cleaner in the middle of the work process.

Rainproof camera and monitor are available as optional accessory, so you can follow the work from the ground and control the tube optimally.

Item Numbers:

Gutter Cleaning system complete, 6 meter	82.97.5220
Gutter Cleaning system complete, 9 meter	82.97.5221
Gutter Cleaning system complete, 12 meter	82.97.5222

The system includes following accessories:

1. Carbon fiber tube 1,5 m Ø52mm with air control valve.....	82.97.1540
2. Carbon fiber tube 1,5 m Ø52mm.....	82.97.1541
3. Flat nozzle	82.97.1542
4. Straight aluminium nozzle	82.97.1543
5. Long, oblique aluminium nozzle	82.97.1544
6. Short, oblique aluminium nozzle	82.97.1545
7. Carbon fibre tube bend 135°	82.97.1546
8. Adapter Ø50mm for hose.....	82.97.1501

And a practical carry bag

Extra accessories

Camera + monitor without recording function.....	82.97.1007
Camera + monitor with recording function.....	82.97.1008

- A complete system - easy to use and transport
- Easy cleaning in high places that are difficult to reach, without using ladder or scaffold
- Up to 12 meters reach
- Camera and monitor (optional)
- Including practical carry bag
